

**In the southwestern highlands of Uganda, 300 orphans fear for their future**

**A generous donation for this school building helped the **KIGEZI ORPHANS PROJECT** to make a breakthrough. Unfortunately, the donors soon withdrew from the project - the well-intentioned blessing turned into a curse within 10 years. The school has grown too quickly and is fighting a losing battle without sustainable structural adjustments.**

**The life's work of Julius and Egidius is on the verge of collapse. Our heart's project will prevent this!**

**The **AMAZIMA ASSOCIATION** - the Swiss partner organization**

**ensures the elementary stabilization of the school and supports the regional community through a sustainable educational and agricultural concept.**
